GO! Sync Insight

Evaluation Simplified

GO! Sync Insight

GO! Sync Insight allows an organization to inexpensively and thoroughly evaluate GO! Sync Mobile GIS using its own data.

Evaluation Simplified

To streamline the initial set-up, TC Technology provides an experienced project manager to perform installation, configuration, and application support. Simply define the business need and provide the necessary information, including:

- Evaluation criteria
- Geodatabase(s) and supporting data (i.e. hyperlinked documents)
- Map documents and templates

Comprehensive Evaluation

GO! Sync Insight is a 30-day client-side evaluation of:

- Mapbook – gestures, map navigation, searching, GPS, routing, tracing
- Redline Extension – standard sketching functionality
- Inspection Extension – a sample inspection form

And includes all necessary remote set-up services:

- Assessment of evaluation environment
- Consultation for configuration and installation options
- Application configuration
- MXD tuning
- Installation
- Evaluation Support

At a Glance:

- 30-day evaluation
- Initial set-up services
- Remote installation
- Remote support
- Real data
- Experienced project manager

“ The advantage of the GO! Sync Insight is that it allows an organization to concentrate its efforts on a full-featured software evaluation by saving time and money on the initial set-up of GO! Sync Mobile GIS.”
